Reasons for Allowance

The following is an Examiner's statement of reasons for allowance:

The prior art of record fails to fairly, teach, show or suggest, by either anticipating or rendering obvious, the invention as set forth in the claims of the instant application.

Furthermore, a search made does not detect the combined claimed elements as set forth in the pending claims. Additionally, the reasons for allowance of the claims over the prior art of record is believed to be readily clear, self evident and apparent from the claim language set forth in sole independent claim 1, when compared and contrasted with the prior art.

More particularly, the instant invention (as set forth in independent claim 1) provides for a structure for rapidly detaching or installing a CD-ROM drive from or to a case of a computer. The structure includes a frame received in a slot of the case of the computer comprising a side opening and an interior cavity in communication with the opening so that the CD-ROM drive can be mounted in the cavity through the opening, and a latch that is matingly coupled with an interior slit provided on the case of the computer for securing the frame to the case or that is disengaged from the latch for detaching the frame from the case; an elongated fastening assembly at a side of the cavity, the fastening assembly comprising an elongated sliding member and an elongated fastening member, wherein a movement of the sliding member toward or away from the side opening causes the fastening member to move toward or away from the CD-ROM drive for either securing the fastening member to the CD-ROM drive or disengaging the fastening member from the CD-ROM drive.

The cited prior art of record however, does not teach, show or suggest, the structure including the frame, side opening and an interior cavity in communication with the opening so

that the CD-ROM drive can be mounted in the cavity through the opening, latch that is matingly coupled with an interior slit provided on the case of the computer, elongated fastening assembly at a side of the cavity, which includes an elongated sliding member and an elongated fastening member, wherein a movement of the sliding member toward or away from the side opening causes the fastening member to move toward or away from the CD-ROM drive to secure the fastening member to the CD-ROM drive or to disengage the fastening member from the CD-ROM drive, as set forth in claim 1 of the instantly claimed invention.

Thus, none of the cited prior art of record discloses the invention as set forth in the manner, function and relationship relative to other claimed structure as prescribed by the independent claim 1.

Additionally, claim 1 does not provide, alone or in combination with the art of record or general knowledge within the art, any suggestion or teaching for the invention as set forth in the independent claim 1.

Conclusion

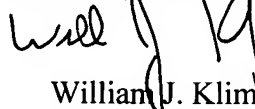

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
